

Wood Burning

PureFire, green technology to provide the cleanest woodburning fireplaces on the planet! EPA phase 2 qualified and best of all affordable for the homeowner.

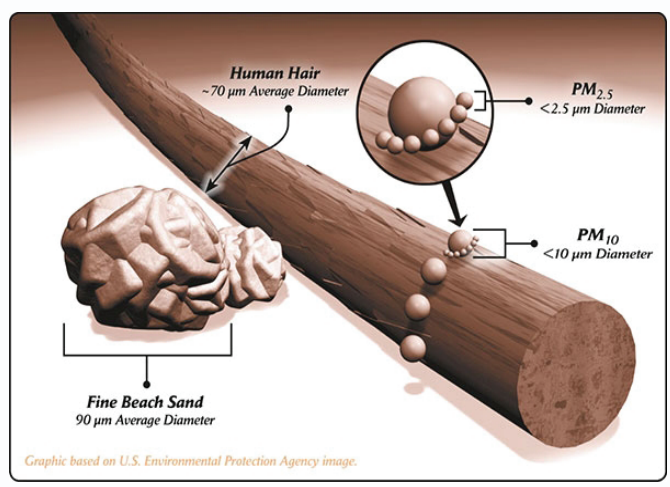

Traditional Wood Burning Looks, Outstanding Clean Burning Performance

FMI PureFire™ wood burning fireplaces cost thousands less than other fireplaces meeting the same standards, and are only a few hundred more than a non-EPA qualified wood fireplace.

Benefits

- Reduces current particulate emissions by approximately 75%. (See chart for illustration.)
- Virtually eliminates carbon monoxide (including CO from gas logs)
- PureFire™ is a passive system. Burn a fire the same way you always have. No moving parts and no special requirement.
- After Market Product
 - * Installs in less than 45 minutes
 - * Maintenance free – no cleaning or special care required
 - * Aesthetically neutral – you can't see it after it's been installed.

The World's Cleanest Wood Burning Fireplaces!

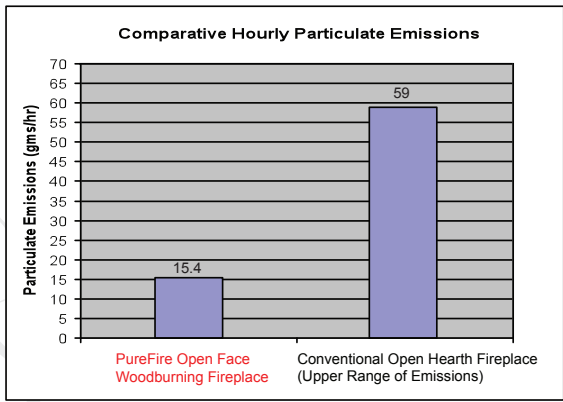

EPA Standard to stop matter between PM₁₀ to PM_{2.5}
 PureFire™ Technology removes matter down to PM_{2.5}

PureFire™ Reduces Particulates by Approximately 75%

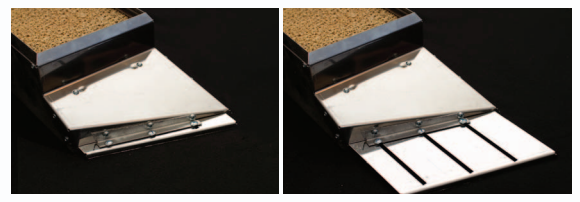

*PureFire™ catalyzes all organic compound (PM and CO)

*Allows cool ambient air to bypass catalyst

g/kg conversion to grams per hour
 *g/kg multiplied by the quantity of wood burned (in kilos) equals grams per hour. The average kilos burned per hour is 4.1 (as tested by OMNI for EPA)

PureFire™ Aftermarket Adjustable Hoods:

PureFire™ Aftermarket Adjustable Emission Control Hoods	
MODEL	DESCRIPTION
