Stainless Outdoor Design

Our grand Portofino models set new standards for wood burning quality, performance, beauty and perhaps most notably, scale. Available with standard refractory brick panels, they're the only manufactured fireplace that offers a true, masonry appearance, with enormous opening dimensions and a clean face design with no visible interior sheet metal... plus lots of other beautiful new features homeowners will love!

Portofinos boast enormous opening dimensions and clean face masonry design with no visible smoke shelf or other steel components. They feature the industry's finest, most realistic textured refractory brick liner and a convenient ash dump in the hearth floor.

Portofinos come standard fully insulated and vent with our 12" double wall pipe for trouble free operation and maximum heat output in any climate or conditions. The gas log ready feature allows homeowners to add Fmi gas log sets with all gas connections and controls hidden out of sight. You see only the beautiful flame, premium gas logs.

True hand crafted masonry firebox look and performance at a fraction of the cost and installation time. Portofinos are UL 127 lab tested and certified. Our large 12" double wall pipe provides trouble free operation. This means guaranteed performance to eliminate homeowner call backs.

Portofino models feature our hidden side screen pockets and the industry's finest textured refractory brick liner.

J42H fireplace with Herringbone brick in natural white.
