Stunning Looks, Innovative Design

Fmi's grand Georgian Masonry models set new standards for wood burning beauty, scale, quality and performance, but our new firebrick lined models featuring Mosaic Masonry™ technology revolutionized the industry. These award-winning Georgians offer true, luxurious masonry at a fraction of the cost and installation time of site-built... and features homeowners will love!

The absence of any interior sheet metal is the foundation for a true masonry product. Georgians boast enormous opening dimensions and clean face design with no visible smoke shelf or other steel components. The Mosaic Masonry™ firebrick lining system positions Fmi's Grand Masters Series as the industry's only real masonry, factory built and UL 127 certified fireplaces! The beautiful kiln-fired clay firebrick lining kit is indistinguishable from site-built masonry, and is available in both traditional Warm Red and Ivory.

Georgians come fully insulated standard, and vent with our 12" double wall pipe for trouble-free venting, and operation with maximum radiant heat output in any climate or condition. The patented Mosaic Masonry™ firebrick kit is a complete masonry lining system of engineered, steel reinforced, kiln fired clay firebrick walls that install as easily as typical factory- built concrete liners, but finish just like site-built masonry. They're even factory grouted to minimize site installation time. Hand crafted masonry finished fireplace at a fraction of the cost and installation time of site-built; with factory controlled quality, and performance.

Georgian Masonry are available in 36", 42" and 50" wide openings with Full 30" clear opening height.

Mosaic Masonry™ made simple. All new engineered firebrick walls are hand grouted in the factory for ease of installation.

Georgian Masonry Wood Burning Fireplace Product Offering
