Timeless Beauty, Unlimited Possibilities

Woodburning ambiance is the standard all fireplaces are judged by, and Fmi's line of woodburning fireplaces are the standard of the industry. When architecture demands something creative, we're ready then, too. See thru, left or right corner models, peninsula... whatever the job requires, Fmi has the perfect fireplace.

The Inglenook corner models are available in both left and right side open versions and offer space saving design to accommodate any open cornered wall. We offer louvered and clean faced models. Circulating louvered models accept the optional fan kit. Clean faced models have a sleeker more modern design.

Fmi also offers three Windsor see-thru models. All models are smooth-faced, and share the same hearth area dimensions. Two models utilize the space saving 8" venting. Choose with or without insulation. We also offer a model that utilizes the more free-flowing 12" system.

The Monterey is Fmi's large peninsula model featuring openings on three sides. It is also smooth faced and requires 12" chimney for optimum performance.

All Fmi woodburning fireplaces feature built-in value and quality standard features for builders including textured charcoal powdercoat finish, quality refractory brick liners, wire mesh firescreens and a pre-wired electrical junction box on air circulating models ready to accept optional heat blowers and other accessories.

The Monterey peninsula fireplace offers a wide open viewing area from 3 sides.

Inglenook corner models are offered in left or right open versions, and either circulating or clean-faced.
