Beauty meets Convenience

Our Mission B-vent gas fireplaces let homeowners have it all: beauty, performance and convenience. You can install Mission units in a wide variety of locations. They're a key part of our exciting Renaissance Series, which offers a consistent look, sizing and construction across the entire line... plus beautiful new features homeowners will love!

Mission models feature an attractive, multi-dimensional refractory log arrangement and deep glowing ember bed. The aluminized dual yellow flame burner creates the cozy feel of a real wood fire. The Mission also features EZ-Access flame control and position lock outside air controls and is pre-wired to operate from either wall switch or remote control.

Gas controls can be accessed through either the lower face panel or inside refractory door so you can install a full-face surround. Mission converts easily from clean face to circulating in the field. The Mission comes standard with textured refractory brick floor and we've added full-length nailing flanges, and drywall stops for easy installation.

The Mission's premium gas logs and glowing ember bed offer the rich ambience of a real wood fire with dancing yellow flames.

With innovations like hidden screen pockets, you see only the beauty of flame, logs and ember bed.

M36B features textured refractory brick-lined interior.

M42H (shown with optional stamped steel louvers) features herringbone textured refractory brick-lined interior.

Mission B-Vent Fireplace Product Offering
