Stunning Looks, Outstanding Performance

Homeowners love big, traditional masonry fireplaces. They also love the comfortable, efficient zone heat that vent-free appliances provide them. The Bavarian Masonry vent-free fireplace offers all these benefits and more... with a host of beautiful features homeowners will love!

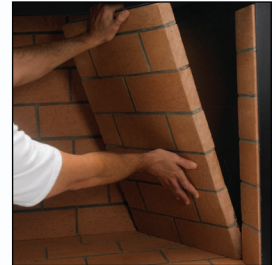

These unique fireplaces feature enormous firebox dimensions with a smooth style face in beautiful brushed stainless steel. When finished flush to the opening, the absence of any visible sheet metal creates the foundation for a true masonry hearth presentation. Fmi's Mosaic Masonry™ firebrick lining system positions our Grand Masters Series as the only real masonry, factory built and lab certified fireplaces! The beautiful firebrick kit is indistinguishable from site-built masonry and is available in both traditional Warm Red and Ivory.

Fmi uses only the finest appliance grade stainless steel and kiln-fired clay firebrick. Quality checks at each level of production assure a good quality product every time. Despite the authentic, site-built masonry appearance, the Venetian is actually an ANSI Z21.91 "zero clearance" certified fireplace. This means flexible installation options and guaranteed performance, and... it's approved for indoor as well as outdoor use and without any venting to worry about, they're versatile, enough for smaller, unconventional or restricted lots.

The patented Mosaic Masonry™ firebrick kit is a complete masonry lining system of engineered, steel reinforced, kiln fired clay firebrick walls that install as easily as typical factory-built concrete liners, but finish just like site-built masonry. They're even factory grouted to minimize site installation time.

Mosaic Masonry™ made simple. All new engineered firebrick walls are hand grouted in the factory for ease of installation.

Firebrick system features steel reinforced, factory-built and grouted masonry walls that easily slip into place and securely fasten to the steel fireplace chassis.

Bavarian Masonry are available in 36", 42" and 50" wide openings with Full 30" clear opening height.
