Clean Face Masonry Design

There's a growing demand for vent-free gas fireplaces because they're 99 percent energy-efficient and can be installed virtually anywhere. FMI's Bavarian vent-free models deliver these benefits and more. Our Bavarian models set new standards for quality, performance, beauty and perhaps most notably, scale. Available with standard refractory brick panels, they're the only manufactured fireplace that offers a true, masonry appearance, with enormous opening dimensions and a clean face design with no visible interior sheet metal... plus lots of other beautiful new features homeowners will love!

Bavarian's boast enormous opening dimensions and clean face masonry design with no visible smoke shelf or other steel components. They feature the industry's finest, most realistic textured refractory brick liner and a convenient ash dump in the hearth floor.

The Bavarian comes equipped with full insulation, mesh spark screens and the gas log ready feature allows homeowners to add Fmi gas log sets with all gas connections and controls hidden out of sight. You see only the beautiful flame, premium gas logs and ember bed, even if you include a remote control option.

True hand crafted masonry firebox look and performance at a fraction of the cost and installation time. Bavarian's are ANSI Z21.91 lab tested and certified.

Bavarian models install straight and secure every time thanks to full-length nailing flanges, and drywall stops.

They also feature the industry's finest textured refractory brick liner. Simply choose from either Stacked or Herringbone Pattern in Warm Red.

Bavarian models are available in 36", 42" and 50" wide openings with Full 30" clear opening height.
