Warm Up To A High-Efficiency Gas Fireplace

There's a tremendous demand for vent-free gas heaters because at 99%, they're the most energy-efficient of all hearth products, and they can be installed virtually anywhere. When architecture demands something really creative, we're ready then too. See-thru or Peninsula, clean faced or circulating... whatever the job requires, FMI has the right fireplace. ... Paired with Fmi's multi-view vent-free gas log heaters, these fireplaces deliver all the beautiful features homeowners will love!

Each model features heat deflection hoods and decorative chain mesh spark screens on each of the multiple viewing openings. Standard features also include attractive refractory brick panels.

Solid steel construction and tough, charcoal powder coat finish are standard.

You have an array of attractive and functional extras, including heat circulating fan kits, brass louvers, and much more.

Fmi vent-free fireplaces are universally listed, and can be paired with any vent-free gas log heater (physical size limitations apply).

Installation costs come way down when you eliminate venting and chase construction. Particularly in multi-story housing. Multi-view designs allow a variety of creative architectural applications with minimum construction or space requirements.

Refractory brick liners, premium rolled louvers, and pre-wired "J" box are all standard.

Universal See-Thru firebox adds charm and beauty to two rooms at once. See-Thru firebox combined with a FMI multi-sided gas log set.

Universal Peninsula firebox combined with a FMI multi-sided gas log set. brings warmth to any home.
