

SHERIDAN

Vent-Free

24" Model Shown

The Sheridan's intricately detailed, generous 9 log stack is painstakingly recreated from an actual wood fire complete with logs, coals and embers.

Absolute Safety

The Sheridan's intricately detailed, generous 9 log stack is painstakingly recreated from an actual wood fire complete with logs, coals and embers. Then they're hand finished in natural wood tones throughout the deep bark patterns, split wood highlights, and even the smoked, charred features, like a real, active fire.

A glowing flame presentation like this in a vent free heater can only be achieved through superior design and nearly perfect fuel combustion. The Sheridan's high efficiency burner design maximizes the glowing and heating properties of the ceramic material, yet still achieves the cleanest, most complete burn in the industry!

You can rest assured that your new Sheridan is the safest vent free gas log heater available. In addition to standard oxygen depletion safety controls, and industry-leading, clean flame combustion technology, the entire log set is unitized in a pre-assembled arrangement. This feature assures maximum performance and eliminates the possibility of log misplacement or movement, and potential degradation of indoor air quality. The control and gas train are 100% factory assembled and tested.

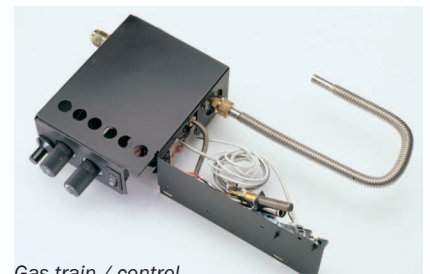

The Sheridan's unitized, fully assembled design also makes installation a breeze! Just complete the gas connection using the shut-off valve and stainless flex connector provided. Like all FMI logs, the Sheridan doesn't require any break in or "burn off" period, so you can enjoy your new heater instantly with the convenience of the hand-held remote control.

Unitized log arrangement is intricately detailed. 18" model shown.

Standard Features

- Realistic ceramic fiber log set and ember bed; unitized to assure safety, performance and ease of installation.
- Single flame, high efficiency burner system for realistic look and feel creates active, colorful flame presentation and plenty of glowing coals.
- Hand-held remote control.
- Decorative control cover, log scraps, and lava floor cinders complete the custom hearth presentation.
- 99% heating efficiency.
- Fully assembled millivolt gas train assembly; front mounted for easy access and includes matchless, piezo igniter.
- Dual certification for use as a vent free gas heater (ANSI Z21.11.2) or as vented, decorative gas appliance (ANSI Z21.60.A-2000).

Gas train / control assembly is fully assembled and factory tested.
