PRO SERIES VENT-FREE GAS LOGS

The PRO SERIES vent-free gas logs are endowed with robust character and features. The unitized log models in the PRO SERIES are pre-assembled and affixed to the triple-flame burner to create an easy set-up and installation. The multi-sided log model showcases 360 degrees of elaborate log design that is perfectly suited for peninsula and see-through vent-free gas fireboxes. The concrete log models in this series are molded from real timber using a concrete composite to recreate the look and feel of real fire wood.

The PRO SERIES Triple-Flame Burner boasts a triple burner and glowing ember bed at its base to achieve the look of a real wood fire. Flickering embers are achieved through the use of two unique technologies. The Triple-Flame burner offers the distinctive feature of an additional row of flames behind the logs. The result is a striking appearance with a very deep flame pattern.

Which Superior Model is Right for You?

Superior offers a broad line of vented & vent-free gas logs featuring a variety of styles and sizes.

Just follow the easy steps below to choose your great looking set of Superior gas logs.

1. Installation Considerations

Superior "Vented" Gas Logs install in any properly certified and vented masonry and factory built wood burning fireplaces. "Vent-Free" Gas Logs can be installed in any certified vented fireplace or any ANSI Z21.11 certified vent-free universal firebox. All vent-free burner systems with variable manual controls, including remote ready, are also listed to the ANSI Z21.60 Vented Log Decorative Standard, which requires the GA6080 damper clamp accessory.

2. Control Choices

Superior Gas Logs are available in five control types: Manual, Thermostatic, Variable, Millivolt & Electronic Ignition. All offer easy, reliable and economical heating. Several models use a "matchless" piezo ignition system, and other Superior Vent-Free models use an "Auto-Light" ignition, a battery-powered continuous spark system that lights the burner faster.

Manually Controlled Models

Manual control allows you to select the heat setting and flame height you desire by simply turning a control knob to enjoy flames and glowing coals from both burners.

• Thermostatically Controlled Models

Thermostat control gradually modulates the heat output and flame height from high to lower settings, or pilot, in order to maintain a consistent room temperature. Even at the lowest setting you enjoy glowing coals and realistic flames from two burners.

Variable Remote Controlled Models

Variable remote control offers three modes of operation: manual, thermostatic, or smart mode. In smart mode, the system electronically duplicates a hydraulic thermostatically controlled valve by increasing/ decreasing the input rate/flame height based on the difference in room temperature and the set temperature. These systems allow 6 flame height settings from low to high while in either the manual or thermostatic modes settings.

Millivolt Controlled Models

Millivolt controlled models operate with the manual variable controls or your choice of four remotes.

- 1. The Wall Mount Off/On Switch will enable you to turn your log set from pilot to on at the flip of a switch.
- With a Wall Mount Thermostat Switch set the wall thermostat at the comfort level you desire and the log heater will automatically cycle from pilot to the heat setting selected.
- The On/Off Remote Control enables you to turn the log heater off or on using the hand-held control. A child safety lock feature is included for additional safety assurance.
- The Thermostat Remote Control allows you to view the time and room temperature or operate the log heater in a manually or

automatically (thermostat) controlled mode, plus you can turn it off or on without ever leaving the comfort of your easy chair! Note, the log heater will always operate at the heat setting (and flame height) selected unless it is manually changed. A child safety lock feature is included for additional safety assurance.

• Electronic Ignition Models

The electronic ignition valve systems offer two modes of operation: manual or thermostatic. These systems allow 3 flame height/input settings: low, medium, or high. The pilot lights each time the system is set or calls for heat. This means that the pilot never burns when the main burners are off. When compared to other valve systems, the cost of fuel to continually operate the pilot is avoided and therefore saves the homeowner money by reducing their fuel usage.

3. Premium Burner Choices

All models (except Merit Series) include Flex Lines to simplify installation. Our three premium burners (VFGT-MNF, Glow Ramp and Triple Flame) have two things in common – heavy duty wood burning grate and realistic ember bed. Burners are designed with very distinctive features in mind:

• Custom Series "VFGT/VTDGT" (MNF)

High flame with 19" logs. Unique burner cantilevered at 45° angle.

• Custom Series "Glow Ramp" (BGE)

Unique to industry. Performs same as radiant heater, glowing center fiber log reaches temperatures in excess of 2000 degrees.

• Pro Series "Triple Flame" (TF)

Additional burner behind rear log for unique depth of flame.

4. Size Choices

Superior Gas Logs are available in 18", 24", 30" & 36" sizes.

5. Fireplace Hoods (if required)

A fireplace hood accessory may be required to deflect heat away from your mantel shelf. Fits fireplace openings from 28" to 48" wide. Installs easily with glass doors or to the lintel of the fireplace opening.

6. Log Accessory Kit (LAMF)

This accessory is not only functional but beautiful as well! The set includes seven log pieces featuring realistic bark, split and charred areas.
