Standard Traditional Series

Performance Traditional Series

Premium Traditional Series

Multi-View Series

Traditional Series

### Standard

Vantage Hearth's *Standard* B-Vent Gas Fireplaces from the Traditional Series offer the beauty of a wood burning fireplace with the convenience and economy of natural gas or propane. With no outside brick chimney required, these fireplaces install almost anywhere in a home. All that is needed is an inexpensive B-Vent chimney system. The *Standard* model comes in a 32 inch size with a smooth face, black interior and 4 inch venting system.

### Premium

Fully loaded and truly impressive, Vantage Hearth's Traditional Series *Premium* is the flagship product, and sets tough new standards for any B-Vent Fireplace. The innovative *Premium* captures all the latest visual and functional technologies, features and conveniences available. *Premium* models are available in 36 and 42 inch sizes with a smooth face, ideal for custom trim applications such as stone or marble. Includes a 6 inch venting system.

### Performance

The *Performance* B-Vent Fireplaces offer a beautiful, traditional fireplace setting at an attractive price. Available in 32 inch, the *Performance* offers your choice of Black interior or Stacked brick and comes standard with a 5 inch venting system. The removable smooth face panels allows flexibility of accessing the gas controls through either the lower face panel or refractory floor, to allow installation of a full face surround.

Luxury Series

Vantage Hearth's Mosaic Masonry<sup>™</sup> technology is a dramatic development that will change the way you think about the fireplace. This technology combines traditional appearance and traditional materials with modern assembly techniques to create a fireplace that is unparalleled in its beauty and value.

Two trends related to today's homes make our patentpending Mosaic Masonry<sup>™</sup> technology significant. First, homeowners want distinctive, high quality products in their home. Surveys of top home builders and buyers alike confirm that homeowners are paying more attention to the details in their homes, and are looking for choices and selections to make their homes more attractive, more distinctive, more valuable. Secondly, people also want convenience. We all want home products that are easy to install, and are easy to operate. The Mosaic Masonry<sup>™</sup> technology does both these things.

There are two types of fireplaces on the market today: One, a masonry fireplace, is built brick-by-brick by a skilled mason. These are the oldest fireplaces, and considered the aesthetic standard for all fireplaces. The second type of fireplace is a prefabricated fireplace, with factory-built components that are available at a fraction of the cost of a regular masonry fireplace. These fireplaces are tested and certified to established safety standards, and are available in both gas and wood burning models.

The Mosaic Masonry<sup>™</sup> technology uniquely combines that quality appearance of a masonry fireplace with the installation convenience and more reasonable cost of a factory-built fireplace.

h hat ntrst, in s

Pre-engineered firebrick wall system features steel reinforced, factory-built and grouted masonry walls that easily slip into place and securely fasten to the steel fireplace chassis.

Luxury Series Premium Chassis is equipped with Mosaic Masonry<sup>™</sup> Firebrick. Simply combine the Premium gas burner / module.

### **Premium Masonry**

The first thought you may have of the *Premium* from the Luxury Series is that it doesn't look like a gas fireplace. And if so then we've done a good job. We started with an enormous, wood burning fireplace chassis featuring our patented firebrick lining system; indistinguishable from site-built masonry. Then we added a low profile, ceramic ember-ramp log set with lively, natural flame patterns and a deep smoldering glow. We hid all controls and gas lines beneath the hearth floor to maximize the woodburning look and feel. Then we topped it all off with a set of beautiful hand forged andirons and a detailed hearth media kit.

The *Premium* Masonry features our new patent pending Mosaic Masonry<sup>™</sup> firebrick walls. The traditional manufactured fireplace chassis is designed to accept a variety of kiln-fired clay firebrick walls. After the easy to install masonry wall system is fastened into place, the patented, fully unitized ember bed ramp burner and log module drop into the hearth floor. This feature also allows for the installation of future, technologically advanced,

log and burner systems as they develop. It features a fully electronic ignition system with a 40% turn down capacity which can be operated by wall switch or included remote control. True hand-forged andirons and masonry chainmesh pull screens complete the luxurious masonry design.

*Premium*'s patented, radiant heat technology is the most realistic, convenient, and heat efficient gas log system made. It's designed to produce an intense red glow that not only creates uncanny wood burning realism, but also produces radiant heat with efficiencies comparable to most direct vent fireplaces, and clearly superior to any open-faced gas fireplace or conventional gas logs.

with Herringbone Ivory Brick

Fully electronic ignition and gas controls are hidden for realism, and accessible though the front hearth brick.

Multi-view Series

## Corner

Vantage Hearth's *Corner* is the perfect space saver model. These units, available in both left and right facing fireplaces, will blend into any open cornered wall or can be incorporated into room dividers. These unique designs offer a full 180° fireplace viewing area.

The 36" *Corner* features the tool-less entry hinged glass door design and comes standard with full refractory brick liner, ceramic fiber round oak log set, and flex gas line with shut-off valve. Piezo ignition and adjustable flame control on millivolt models only.

## See-Thru

Vantage Hearth's See-*Thru* allows you to enjoy the beauty of the same fireplace from two rooms. This unit is ideal for either new construction or an addition to an existing wall.

The 36" See-Thru features the tool-less entry hinged glass door design and comes standard with full refractory brick liner, ceramic fiber round oak log set and flex gas line with shut-off valve. Piezo ignition and adjustable flame control on millivolt models only.

## Peninsula

Vantage Hearth's *Peninsula* is a perfect match for a custom home or office. This model is equally beautiful when viewed from any of the three open sides.

The 36" *Peninsula* features the tool-less entry hinged glass door design and comes standard with full refractory brick liner, ceramic fiber round oak log set, and flex gas line with shut-off valve. Piezo ignition and adjustable flame control on millivolt models only.
