

**HARLEY DAVIDSON**

**PAN AMERICA REAR SEAT INSTALLATION GUIDE**

**Installation:** Due to the enhanced design of the Sargent seat foams, installing the rear seat requires a slightly different approach than installing the OEM seats.

First, install the front seat to your preferred HIGH or LOW position as per OEM instructions.

Next, guide the rear seat into place by aligning and engaging the two rear seat hooks into their respective receivers.

Then, while standing next to the motorcycle (as pictured), push down on the rear of the front seat ① and hold pressure, then push the rear seat forward ② then down ③ to latch.
