

**BMW R 1100 S  
SARGENT WORLD SPORT PERFORMANCE SEAT  
INSTALLATION GUIDE**

**In this package**

One World Sport Performance seat  
Two adapter pins (late model only)  
One tool kit pad (foam) with adhesive strips  
Two seat cowl thumb screws with washers  
Warranty

**Note for Early &  
Late Models**

*The rear Locking Bar on the World Sport Seat is adjustable, fore to aft. It is pre-set at our factory and no adjustment should be required.*

*The World Sport Seat uses the thumb screw/washer set-up (included) instead of the stock quarter-turn fasteners for rear seat cowl attachment.*

*Early model owners, you may disregard the two Adapter Pins (if included). These pins facilitate use of this seat on the Late model BMW R1100S (years 03/01+)*

*If you are using a towel or other thin object here, it should be soft, flexible and no more than 1/2" (12.7mm) thick.*

**Early Model (02/01-)  
Installation**

Simply remove your stock seat and install the World Sport Performance Seat.

**Late Model (03/01+)  
Installation**

Remove the stock seat.  
Remove the **two** rubber grommets from the stock seat (see 1).  
Insert the Adapter Pins into the grommet posts (see 2).  
Install the rubber grommets onto the Adapter Pins (see 3).  
Install your World Sport Seat.
