

**DUCATI 1098
SARGENT WORLD SPORT PERFORMANCE SEAT
INSTALLATION GUIDE**

Tools Required

4mm Hex wrench

Installation

Remove the stock seat by accessing the rear seat bolts by gently lifting and pulling back the left and right rear corners of the seat. Using the hex wrench, remove the two bolts. Lift the seat up and back to remove.

Install your new seat by reversing the process outlined in step 1.

Your new World Sport Performance Seat is designed with special tabs to help stabilize the rear foam area. Hook the upholstery over the tabs as shown.
