

# CP4 CELLULAR ENABLED VEHICLE RECORDER

## USER GUIDE

v1.0.1

**WARNING:** SmartWitness installations should be performed by a qualified individual or installation professional only. Working with a vehicle's power system can be dangerous to both you and your vehicle. This installation is intended only to be a guide since vehicle designs and power/input sources can vary significantly from vehicle to vehicle.

If you need to schedule a professional installation service in the USA for your SmartWitness device(s), please visit <http://smartwitness.com/scheduleinstall> and submit the online form.

## SAFETY ADVICE

### CAUTION

**RISK OF ELECTRIC SHOCK  
DO NOT OPEN**

**CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK,  
DO NOT REMOVE COVER.  
NO USER-SERVICEABLE PARTS INSIDE.  
REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

Please make sure you follow the safety advice/instructions given in the user guide.

#### **Caution**

**RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.  
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.**

Battery for RTC(Real Time Clock) inside

#### **Caution**

**Install the product where it does not block driver's visibility and where there is no airbag installed. This could cause an accident or might injure passengers in case of accident**

#### **Caution**

**Damages due to production malfunction, loss of data, or other damages occurring while using this product shall not be the responsibility of the manufacturer. Although the product is a device used for recording videos, the product may not save all videos in the case of a malfunction. In the case of an accident, the sensor may not recognize the shock when the impact is light and as a result it may not begin recording automatically.**

#### **WARNING:**

**TO PREVENT FIRE OR ELECTRIC SHOCK HAZARD, DO NOT EXPOSE  
THIS APPLIANCE TO RAIN OR MOISTURE.**

# GPS RECEPTION

- 1. Activate the product in an area without large buildings to improve GPS reception.**

The commercial purpose GPS has the average range error of more than 15 meters and the range error could be more than 100 meters due to environmental conditions like buildings, roadside trees etc.

- 2. The temperature range for optimum operation of the GPS receiver in your car is -10 ~ 50°C.**
- 3. When using the product for the first time or after a long period (more than three days), it may take a little longer to recognize your current location.**

It may take between five and thirty minutes to get GPS reception.

## GPS reception may be impaired under the following circumstances

- 1) If there is an object at the end of the GPS antenna
- 2) If your vehicle has metallic elements on the windshields
- 3) If equipment generating electromagnetic waves that interfere with the GPS signal is installed in the vehicle e.g.: Other GPS devices such as a certain type of wireless activated alarms, MP3 and CD players and camera alarms using GPS.
- 4) If you are using a receiver connected by cable, electric interference can be avoided by simply changing the location of the receiver (antenna).
- 5) On heavily overcast or cloudy days, if the vehicle is in a covered location such as under a bridge or raised roadway, in a tunnel, an underground roadway or parking area, inside a building or surrounded by high-rise buildings.
- 6) If GPS signal reception is poor, it may take longer to locate your current position when the vehicle is moving than when it is stationary.

# FUNCTIONS

## Automatic Booting

Make sure the main unit and all component are properly connected. Once the CP4 has been wired to your car power source the CP4 will be boot up, this will take around 30 seconds for the unit to be ready to record.

NOTE: The unit will not start recording immediately after power on. It takes around 30 seconds for the built-in power backup system to charge. Thereafter, the SD card will be ready to record.

## Continuous Record (When Record mode set as “Continuous”)

This is the default mode for recording. In this setting the unit will begin recording after boot up and record the entire time the unit is powered.

The resolution and frame rates can be set as per your requirements. You can change the configuration of the recording using the CP4 configuration Tool. To do this, please see the ‘Settings’ section on page 21.

## Event Record (When Record mode set as “Event”)

The unit will record when triggered by an impact(G-Sensor) or a push of the ‘PANIC’ button or Over speed or Alarm In1~3. Each event file contains up to 20 seconds prior & up to 20 seconds post event.

And the event file can be extended by 2<sup>nd</sup> trigger during event record.

When events are triggered continuously, for every event, 20 seconds post-recording from the time of the event will be added to the event data file with a maximum recording time of 3 minutes. When this 3 minutes is reached, the file will be split and a new file will be created but the data will be continuous.

## Dual Record (Continuous & Event Record)

The continuous record fps is 1fps and the file will be stored on the “Normal” folder.

Event record will work according to the Fps setting for example 30frames per second recording and the file will be stored on the “Event” folder

## Do not Record

The DRV (Drive Data) file will be recorded during driving at “Do Not Record” mode. And the unit can send limited API like live track to Server.

NOTE: The DRV file consists of GPS and G-sensor data and it helps to find specific data or driving behaviors. The DRV file overwrites the oldest data. The DVR files will be made every 10 minutes.

# FUNCTIONS

## G-Sensor Calibration

G-Sensor Calibration is needed after installing the CP4.

1. Set G-Sensor Axis using the configuration tool.
2. "selfadj.ini" should be in the config folder of the SD card.
3. Install the unit and park the vehicle on a flat surface .
4. Turn on the unit and wait until it start record.
5. Press and hold the "M1" button more than 2 seconds.
6. You will hear "beep" when you press "M1" button and then you will hear another "beep" after 2seconds. Then release "M1" button.
7. Then calibration will be done within 2 seconds.

## Built-in power backup (Super Capacitor)

When power to the unit is interrupted, CP4 creates the last file using the internal Super Capacitor.

## Time and Date

Set your time zone using the configuration tool then CP4 get's time from the GPS satellite's.

## SD Memory Card Format

Please format [initialize] the SD card using the "Configuration Tool CP4" software.

### Safely Removal SD Card

#### Power off vehicle and take out SD memory card

Turn off the power and then check the BLUE LED light. Once the LED light is not on, you can now safely remove the SD memory card.

# FUNCTIONS

## Parking Mode Recording

With parking mode activated and on normal recording mode, the CP4 will change to parking mode when the vehicle is not moving for more than 5 minutes, recording at 1 FPS.

## Live Screening

With an external monitor attached, the CP4 offers the option to screen video live.

## Delayed Power Shutdown

Control the duration of time using the configuration tool. CP4 stays powered and recording/networking after shutdown.

## Precautions for SD cards

To optimize use and prolong life of your SD cards please follow the below instructions.

1. Use only compatibly tested SD cards.
2. Only use dry and clean SD cards.
3. Format SD cards at least once every month or when the SD card seems corrupted. This will wipe all data, images, and file names on the card reducing recording errors.
4. Insert or remove SD cards only when the device is completely powered off. Wait until the blue LED is completed off before removing SD card.
5. SD cards used for continuously recording equipment such as a drive recorder, typically last only 6~12 months. Exchange SD cards periodically

# INSTALLATION

**WARNING:** SmartWitness installations should be performed by a qualified individual or installation professional only. Working with a vehicle's power system can be dangerous to both you and your vehicle. This installation is intended only to be a guide since vehicle designs and power/input sources can vary significantly from vehicle to vehicle.

If you need to schedule a professional installation service in the USA for your SmartWitness device(s), please visit <http://smartwitness.com/scheduleinstall> and submit the online form.

**Installation Guides can be viewed/downloaded at:**  
**[install.smartwitness.com](http://install.smartwitness.com)**

## Operation – On Screen Display

The following displays can only be seen when a monitor is connected.

The default display is 2\*2 with all cameras shown, to change, press [M2] button to select which camera to view. Each press will change the camera on display with the last option being all camera views.

4Cameras(2x2) => Camera1   =>   Camera2   =>   Camera3   =>   Camera4

# Axis Adjustments by Device Positions

F: Front	RR: Rear	T: Top
B: Bottom	R: Right-side	L: Left side

## 1) When device is in an upright position

## 2) When device is in an upside down position

# Axis Adjustments by Device Positions

3) When device is in a sideways position with the TOP to the left

4) When device is in a sideways position with the TOP to the right

# Axis Adjustments by Device Positions

5) When device is in a sideways position with the TOP facing front

6) When device is in a sideways position with the TOP facing rear

REMARK: Do no install the device with the Front facing down position.

# CONFIGURATION TOOL USER GUIDE

## Configuration Tool CP4 Software

### PC SYSTEM REQUIREMENT

Recommended PC specifications for Configuration Tool Software

OS	Windows Vista. Windows 7, Windows 8/8.1
CPU	Core 2 Duo 2.5GHz or Higher
RAM	2GB or Higher
Interface	SD Memory Card Reader
HDD Free space	Install : 55MB or Higher Backup : 4GB or Higher
Display	1024 x 768 pixel/True Color or higher

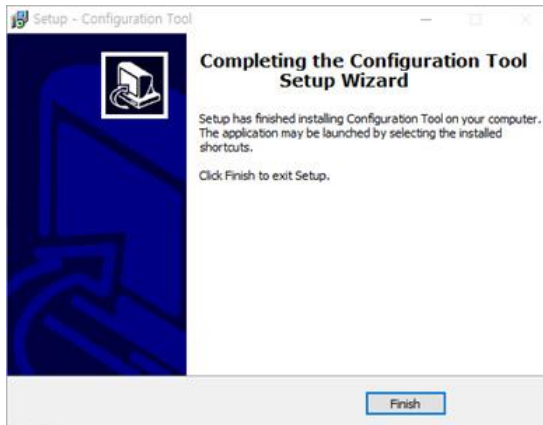

If the PC does not meet the minimum system requirement, the Configuration Tool Software may not function properly.

# SOFTWARE INSTALLATION

---

Please ask the Configuration Tool CP4 Software to your distributor.

1. Double click [setup.exe]
2. Select the language
3. Select destination location
4. Select Start Menu Folder then follow the dialog box prompts.

5. The "Configuration Tool CP4" icon will be displayed on your desktop.

## **NOTE: To Un-install the Configuration Tool CP4 Software**

Make sure the program is not running and open the 'Control Panel'  
Select 'Remove Program' and remove the Configuration Tool CP4 Software.

# INITIALIZE SD CARD

---

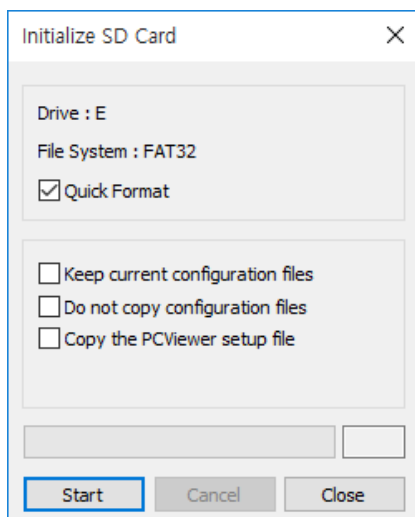

Initialize SD Card

Click!

To initialize the SD card quickly, click on the above icon and you will be presented with the following screen to choose the SD card to initialize. Click 'OK' when selected.

On the following screen, check the 'Quick Format' button and uncheck the 'Keep current configuration files' and Click 'Start' to begin initialization.

# DEVICE SETTINGS

---

The screenshot shows the 'Configuration Tool' window with the 'Device' tab selected. The window has a title bar with a close button (X). Below the title bar are tabs for 'Device', 'Record', 'Event', 'System', 'Network', and 'DMSS'. The 'Device' tab contains several sections: 'Camera' with checkboxes for CAM1, CAM2, CAM3, and CAM4 (all checked), and a 'Video Type' dropdown set to 'NTSC'; 'Signal' with 'Car Pulse' settings (Type: 8, Standard: JIS 4W, 637) and 'RPM' settings (Type: 4); 'G-Sensor Axis' with dropdowns for Axis X, Y, and Z (all set to 0°); and 'Misc.' with checkboxes for 'TV Out' (unchecked), 'Audible Camera Chime' (checked), and 'Buzzer On' (unchecked). There is also a 'Speed Source' dropdown set to 'GPS Speed' and a 'Delayed Power Shutdown' section with 'Hours' (0) and 'Min' (1) dropdowns. At the bottom are buttons for 'About', 'Settings', 'Initialize SD Card', 'Open', 'Save', and 'Close'.

## Camera check box

Check all the cameras you wish to use.

## Camera Title

Use the alphabet and numbers to rename (max 10 digits) the cameras. The new names will be displayed on the all recordings.

**Video Type:** Set the video type "NTSC or PAL"

**Car Pulse Type:** Select the vehicle's car pulse type.

**Car Pulse Standard:** Select the vehicle's car pulse standard.

**RPM Type:** Select the vehicle's RPM type.

**G-Sensor Axis:** Refer to page 14 in this manual and set Axis.

**TV out:** Check it to see live screen.

**Audible Camera Chime:** Turn the Chime on or off

**Buzzer On:** Turn the Buzzer on or off

**Speed Source:** Choose the speed source "GPS or Pulse" to use it on the unit.

**Delayed Power Shutdown:** Set delayed power shutdown time.

# RECORD SETTINGS

Device	Record	Event	System	Network	DMS5
Channel					
	Resolution	NTSC FPS	Quality		
CH1	FHD	10	Standard		
CH2	HD	10	Standard		
CH3	HD	10	Standard		
CH4	D1	10	Standard		

## Resolution

NTSC: D1 (720x480), HD (1280x720), FHD (1920x1080).

PAL: D1 (720x576), HD (1280x720), FHD (1920x1080).

## FTS (Frame Rate)

Adjust the frame rate from                      NTSC: 30fps, 15fps, 10fps, 5~1fps  
PAL: 25fps, 12fps, 10fps, 5~1fps

## Quality

Adjust the picture quality from Standard, High, Super

## Record Frame Rate (FPS) Rules & Bitrates

- 1. FHD: 2Channels total max 30fps(NTSC) or max 25fps(PAL)
- 2. HD: 3Channels total max 60fps(NTSC) or max 50fps(PAL)
- 3. D1: 4Channels total max 120fps(NTSC) or max 100fps(PAL)
- 4. Channel 3 (Camera No.3): Support HD or D1 camera
- 5. Channel 4 (Camera No.4): only support D1 camera.
- 6. Total FPS calculation  
NTSC: (FHD total fps x 4) + (HD total fps x 2) + (D1 total fps) ≤ 120fps  
PAL: (FHD total fps x 4) + (HD total fps x 2) + (D1 total fps) ≤ 100fps

## Maximum bitrates (Video Quality)

Resolution	FPS	Bitrates (bit/sec)		
		Super	High	Standard
Full HD	30	6Mbps	5Mbps	4Mbps
HD	30	3Mbps	2.5Mbps	2Mbps
D1	30	2Mbps	1.5Mbps	1Mbps

# RECORD SETTINGS

**Record**

Record Mode: Continuous

Continuous: 50 % | Event: 50 %

Pre Rec Time: 10 Sec

Post Rec Time: 10 Sec

☐ Audio

☒ Overwrite Recordings

☐ Parking Mode Recordings

**Drive Data**

☒ Driving Data Recordings

☒ Overwrite Recordings

Duration (1 Day 8 Hours): About 7 Days

Misc.

Encryption No. [ ] 1000 ~ 9999

## Record Mode

- Continuous (Always recording when powered by DC 12/24V.)
- Event (Automatically starts recording by G-sensor or Panic button or Alarm In.)
- Dual (The continuous record fps is 1fps and Event record will work according to the Fps setting.)
- Do not record

## Pre Rec Time / Post Rec Time

Adjust the Pre/Post Event time from 5 seconds to 20seconds

**Audio:** Check it for record audio

## Overwrite Recordings

This function allows the unit to overwrite old files on the SD Card automatically. You can overwrite the continuous, panic or G-Sensor recorded files.

## Parking Mode Recordings

If your vehicle is parked for more than 5 minutes, recording FPS will be at 1fps. When the vehicle starts moving again, the recording FPS will return to its original setting.

## Drive Data

GPS data & G-Sensor data will be recorded with videos and at the same time, GPS data & G-Sensor data will be recorded separately, we call it as 'Drive data (drv file)'. Check Driving Data Recordings for this feature.

Adjust Drive Data duration from "about 1 day" to "about 30 days".

## Encryption No. (Stream password)

An Additional password can be set for the recorded data using a 4 digit password from 1000~9999. If a password is set, keep a record in a safe place, Without the password, you will not be able to view the recorded video.

# EVENT SETTINGS

## Event settings

You can set the unit to record when triggered by the G-Sensor, Panic Button and GPS Speed Limit and Alarm Inputs.

And you can set the Alarm out duration per each event.

Device	Record	Event	System	Network	DMS5
G-Sensor	Misc.				
<b>G-Sensor</b>					
		Record CH	Beep	Alarm Out 1	Alarm Out 2
		<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	None ▾	None ▾
<b>G-Sensor Sensitivity</b>					
<input checked="" type="radio"/> Pre-set			<input type="radio"/> Custom		
<input checked="" type="checkbox"/> Simple Setting Mode

Impact		5 ▾			
Accel/Brake		5 ▾			
Turning		5 ▾			
<b>eCall Trigger</b>					
mG (0~4000)		X	Y	Z	
		0	0	0	
<input checked="" type="checkbox"/> Auto adjust G-Sensor to vehicle speed					
<input checked="" type="checkbox"/> Turn Z Axis on					
			<b>High Impact</b>		
			X	Y	Z
mG (0~4000)			600	600	700
Hz (1~20)			4	7	10
			<b>Harsh Accel/Brake</b>		
			X		
mG (0~4000)			190		
Hz (1~20)			10		
			<b>Harsh Turn</b>		
			Y		
mG (0~4000)			190		
Hz (1~20)			15		
			<input type="checkbox"/> Trigger high impact events only		

**G-Sensor Sensitivity:** The shock sensor sensitivity can be set to 'Simple setting Mode' or 'Custom'. Set to easy allows you to set the sensitivity to 9 (High), 5 (Medium) or 1 (Low).

In custom set, you can set 3 different shock sensor values individually.

### Auto adjust G-Sensor to vehicle speed

Once it checked, CP4 will automatically decrease the G-Sensor sensitivity at higher vehicle speeds to compensate for the naturally added G-forces that are experienced due to velocity.

# EVENT SETTINGS

Set Domain/Static IP and Port number

Default License Key is “DASKEY\_001”

And check the options

- Transmit Live Tracking Data
- Transmit Telematics Data (DRV)
- Transmit Event Data.

And then select events

Please contact your distributor to set DMS5 setting it's related with server.

# SOFTWARE USER GUIDE

## PC Viewer Software

## PC SYSTEM REQUIREMENT

Recommended PC specifications for PC Viewer Software

OS	Windows Vista. Windows 7, Windows 8/8.1
CPU	Core 2 Duo 2.5GHz or Higher
RAM	2GB or Higher
Interface	SD Memory Card Reader
HDD Free space	Install : 55MB or Higher Backup : 4GB or Higher
Display	1024 x 768 pixel/True Color or higher

If the PC does not meet the minimum system requirement, the PC Viewer Software may not function properly.

# SOFTWARE INSTALLATION

---

The PC Viewer Software is on the provided SD card. (Also available on our website.)

1. Connect the SD card into your PC (if your computer does not have an SD card slot use the USB SD card reader) and open the “My Computer”
2. Right-click the “FHDRM” drive and select [Open]
3. Double click [setup.exe] in the [pcsw] folder.
4. Select the language and then follow the dialog box prompts.

5. The “PC Viewer CP4” icon will be displayed on your desktop.

## **NOTE: To Un-install the PC Viewer Software**

Make sure the program is not running and open the ‘Control Panel’  
Select ‘Remove Program’ and remove the PC Viewer Software.

# PC VIEWER SOFTWARE SETTINGS

## Software viewer settings

This setting is for the PC Viewer Software itself. To set the Recorder, refer to page 17.

# OPEN FILES

---

If you want to play a specific file that has been backed up on the PC or SD Card, Click the “Open files” icon

“Open files” icon

Select the MDT file you want to play and click “Open”.  
The image of the selected file will then be displayed and you can click the “Play” button to play the file.

“Eject SD Card” icon

When finished, click “Eject SD Card” icon and remove the SD card from your PC.

Or please use  “Safely Remove Hardware and Eject Media” button in your PC.

# PLAYBACK

Camera title - Resolution

Record Mode

The screenshot displays the SMART WITNESS playback interface. At the top, a blue header bar contains the 'SMART WITNESS' logo and a series of icons for various functions. Below the header, four camera feeds are arranged in a 2x2 grid. Each feed shows a different perspective of a road scene with vehicles. The top-left feed is labeled 'CAM1 - 720p' and shows a white car in the foreground. The top-right feed is labeled 'CAM2 - 720p' and shows a silver SUV. The bottom-left feed is labeled 'CAM3 - 720p' and shows a white car. The bottom-right feed is labeled 'CAM4 - 720p' and shows a white car. Each feed displays G-Sensor data (X, Y, Z) and a timestamp. Below the feeds, a control bar includes playback controls (play, pause, stop, previous, next), a progress slider, and a timeline. The timeline shows the current time (19:30:00) and the total duration (09:58). The control bar also displays 'Vehicle HD15', 'Driver HD15x', '0 rpm', and '0 km/h'. There are also buttons for 'ALARM1', 'ALARM2', and 'ALARM3'.

# DRIVE DATA

“Drive Data” icon

The default setting only displays the G-sensor graphs but other information may be added by checking the boxes in the upper part of the screen.

**G-Sensor:** (X axis: red, Y axis: green, Z axis: blue, based on the positioning of the main unit) is shown with the data reference point zero-point calibrated and positive shocks as (+) and negative shocks as (-).

G sensor X value: Front & Back (like Quick brake or Quick Start)

G sensor Y value: Left & Right (like Quick Turn)

G sensor Z value: Up & Down (like prominence and depression)

**GYRO:** display the gyro value

**Speed:** GPS measured speed is displayed in grey. .

**RPM:** The RPM is displayed in purple.

**ALARM:** The alarms are displayed on the bottom of the screen with the grey bar meaning the trigger is activated.

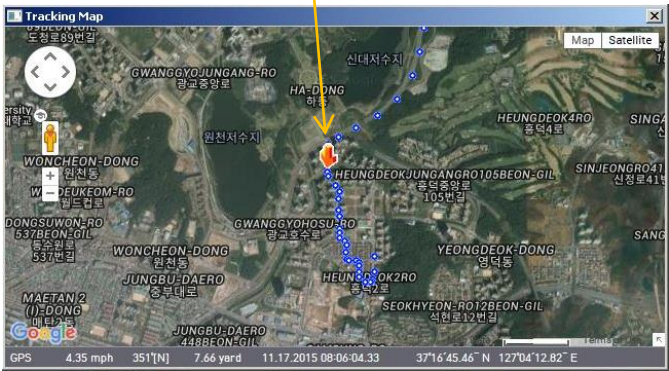

# TRACKING MAP

“Tracking Map” icon

The route taken will be displayed on the Google map.

The playback position will be shown on the map with the orange arrow.

The blue markings show the route taken.

To see the route and position on the Google map, the GPS data should be recorded with video.

To see the map, the PC should be connected to the internet.

# EVENT SEARCH

“Event Search” icon

The “Event Search” help to find a specific data quickly.

Close

Select “Search Range” and select “Search Conditions”

And then click Search button.

Choose an event from the searched list and click “Go to Video” to see the video.

# PRIVACY SETTINGS

---

“Privacy Settings” icon

Set the mosaic area on the video for privacy protection.

When backing up the data as a JPG or AVI format and playing in the Viewer software, you are able to make a mosaic processing on the area you have set.

To do this, put the pause the video and click the ‘Privacy settings’ button. The privacy setting screen will pop up.

Blur out the area you wish to protect by left-clicking on the sections. You can select multiple areas.

You can also unselect, selected areas by right-clicking the blurred areas.

To select all or clear all, click on the ‘Select all’ or ‘UnSelect All’ buttons on the bottom, respectively.

# SAVE JPEG AND MP4 FILE

Pause the playback and click “Save JPG” icon to make JPG images.

## SPECIFICATION

<b>Video In</b>	CH1, CH2: 12V 1080P or 720p AHD camera in CH3: 12V 720P AHD camera in CH4: 12V D1 camera in
<b>Audio In</b>	1CH (Internal or External Microphone)
<b>AV Out</b>	1 Video out, 1 Audio out
<b>Band support</b>	WCDMA Band1(2,100MHz)/ Band8 (900MHz)
<b>Max Data Rate</b>	UL:5.76Mbps, DL : 7.2Mbps
<b>Video resolution</b>	1080p HD (1920x1080), 720P (1280x720), D1(NTSC:720x480, PAL 720x576)
<b>Recording Speed</b>	Full HD: 30fps(25fps), HD: 60fps(50fps) D1: Up to 120 fps (NTSC) or 100fps(PAL)
<b>Recording Mode</b>	Continuous , Event, Dual Mode
<b>Memory</b>	Support 32GB, 64GB(FAT32), 128GB(FAT32)
<b>GPS/GLONASS</b>	External GPS /GLONASS
<b>G-Sensor</b>	Internal 3-axis G-sensor
<b>Gyro</b>	3Axis(X,Y,Z), output rate:100 Hz,
<b>RTC</b>	Internal battery
<b>Alarm In/Out</b>	3 x Alarm In, 2 x Alarm Out
<b>Remote controller</b>	3x LED, Panic button, M1 & M2 button
<b>LED</b>	Green LED (Network), Blue LED (Record), Network (Red LED)
<b>Super Capacitor</b>	Enable recording of last file and shut down
<b>Power input</b>	DC 12V/24V 3A
<b>Delayed Power Shutdown</b>	Supports Delayed Power Shutdown
<b>Power consumption</b>	Max. 36W
<b>Size / Weight</b>	120mm X 28mm X 90mm / 166g
<b>Operation Temp.</b>	-10°C~55°C

## APPENDIX Recording time table

# APPENDIX (Upgrade)

NOTE: To get the upgrade firmware, please contact your local distributor.

## 1. Prepare Firmware

Make a folder called [program] on the SD root folder as shown below,

Copy “XXXXXX\_x.x.x.img” file to the SD card [program] folder.

## 2. Upgrade CP4

Insert the prepared SD card to CP4 unit and turn on the power.

The Blue & Red LED will blink while the unit is upgrading. It will also ‘beep’ continuously. Upgrading the unit usually takes about 30 seconds.

**Warning: Do not turn off the power during upgrading.  
If the upgrade fails, the CP4 unit should be returned  
to your local distributor.**

Once the upgrading is finished, the unit will automatically turn off and on the power.

# Technical Support & Warranty

## **TECHNICAL SUPPORT**

For Technical Support, please contact your local distributor or visit [support.smartwitness.com](http://support.smartwitness.com)

## **LIMITED WARRANTY**

This product is supplied with 1 year warranty. The Warranty excludes products That have been misused, (including accidental damage) and damage caused by normal wear and tear. In the unlikely event that you encounter a problem with this product, it should be returned to the place of purchase.

## Optional Item

Model	Descriptions
CP4-LC 	Locking Steel Housing for CP4 Dimension : 155.00 x 130.00 x 24.00 mm, 330g
CP4-MIC 	External Omni-directional microphone with 8.5 ft. cable
SVA032-A 	1.3Mega-Pixel 1/4" CMOS Sensor, Resolution: 720P, Angle of View: 120° Min. Illumination: 0.1 lux Operating Temperature: -10°C ~ 55°C Input Voltage: DC 12V 31mm(W) x 33.5mm(H) x 25mm(D)
SVA040-A 	1.3Mega-Pixel Sony Exmor CMOS Sensor Resolution: 720P, Angle of View: 120° Min. Illumination: 0.1 lux// IR LED On 0 lux Operating Temperature: -20°C ~ 60°C Input Voltage: DC 12V, 9pcs LEDs 80.5mm(W) x 50.5mm(D) x 61.0mm(H)
SVA036-A 	1.3Mega-Pixel Sony Exmor CMOS Sensor Resolution: 720P, Angle of View: 120° Min. Illumination: 0.1 lux// IR LED On 0 lux Weather-proof Housing (IP69K) Operating Temperature: -20°C ~ 60°C Input Voltage: DC 12V, 12pcs LEDs 59.2mm(W) x 56mm(D) x 62.1mm(H)
SVA033-C2 	1/3" Sony Exmor CMOS Sensor Resolution: 600TV lines, Angle of View: 120° Min. Illumination: 0.1 lux// IR LED On 0 lux Weather-proof Housing (IP68) Operating Temperature: -10°C ~ 55°C Input Voltage: DC 12V, 12pcs LEDs 63.5mm(W) x 57.7mm(D) x 56.00mm(H)
