Boulevard 72-inch Vent-Free Linear Fireplace with Black Reflective Glass Liner and Crushed Glass

Boulevard 60-inch Vent-Free Linear Fireplace with Black Reflective Liner and Log Set with Rocks

The programmable LED lighting system offers a variety of colors.

# BEYOND BOLD

## **Sometimes a fireplace goes beyond just the flame . . . and becomes art**

**With its outsize proportions, its contemporary burner, and its programmable lighting system concealed beneath an ocean of crushed glass, a Boulevard Large Linear Vent-Free Fireplace makes a bold statement that's sure to turn heads in any setting. Choose the Boulevard 60 in single-sided or see-through, or Boulevard 72 – as in a true five foot or six foot fireplace opening. Both systems are available in LP (38,500 Btu) and Natural Gas (40,000 Btu).**

### **Options Abound**

Accessorize your Boulevard Fireplace with the unique ceramic glass black reflective liner to create the illusion of unimaginable depth; or for single-sided models, opt for the brushed stainless steel liner for a brighter contemporary feel.

Choose one of two decorative 1½-inch beveled fronts in brushed nickel or matte black, a simple black ¾-inch frame, or have your contractor install tile, stone or plaster right to the fireplace opening – the ultimate in design simplicity.

The Boulevard 60 See-Through installs on an interior wall with the frames above – or on an exterior wall with the stainless steel outdoor frame. It includes a window and barrier screen. See manual for specific framing requirements.

Your Boulevard requires clear crushed glass to cover the lighting system – five square feet for the Boulevard 60, six square feet for the Boulevard 72, and four square feet for the See-Through Boulevard 60. Add a small amount of color glass or other decorative media, if needed, to help tie the fireplace visually to your room.

Or create a beachfront cottage look with the Blue Bay log set – with six slender driftwood logs perfectly proportioned to the Boulevard's lines, plus an assortment of stones. The logs and stones are molded from ceramic fiber and hand painted for rich detail.

### **Heat and Fire**

At up to 40,000 Btu and 99-percent efficient, your new Boulevard Fireplace can warm a large room with ease. And thanks to its advanced technology, you control the temperature and the ambiance.

The Boulevard's Green Earth Preferred Intermittent Pilot system eliminates the standing pilot – saving energy and your money. When you want fire, press the button – or just let the programmable thermostat maintain your desired room temperature. Thanks to its advanced logic, the thermostat remote control anticipates heat demand and varies flame height to minimize temperature fluctuations in the room.

In the event of a power outage, your Boulevard fireplace can operate on battery backup mode – to provide life-saving warmth for your home until power is restored.

**Beautiful, elegant, and efficient . . . your Boulevard fireplace will add value, ambiance, and warmth to your home.**

The Boulevard 60 See-Through installs as a conventional see-through on an interior wall, but also works as an indoor/outdoor see-through on an exterior wall (requires DFEV60SS stainless steel frame for outside wall).

## DECORATIVE MEDIA (REQUIRED)

Crushed decorative glass is required. Start with Clear Frost, Copper Reflective, or Bronze Reflective, which allow the LED lighting to show from under the burner. Additional decorative media is optional and may be used for accent only. Each package covers approximately 1 square foot.

Clear Frost Crushed

Copper Reflective Crushed

Bronze Reflective Crushed

Blue Clear Crushed

Black Polished Crushed

Aqua Blue Droplets

Sangria Luster Droplets

Glacier Ice Droplets

Accent Pebbles

## LINERS (OPTIONAL)

Stainless Steel

Black Reflective Glass

## TRIM KITS (OPTIONAL)

L to R: Matte Black Trim; Beveled Front in Brushed Nickel; Beveled Front in Matte Black
