

ELEGANT AURA

Direct Vent

FMI presents the new Elegant Aura direct vent gas fireplace; A traditional masonry styled fireplace featuring the latest technology and unique design innovation.

Stylish & Contemporary

Direct vent gas fireplaces are a great hearth innovation. Their indoor air quality, efficiency and installation advantages have solidly established them as today's leading fireplace category. However with all their exposed louvers and sheet metal, most direct vents look more like a microwave oven than a fireplace.

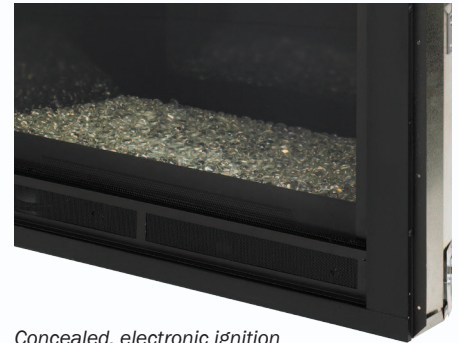

The clean faced design of our new Elegant Aura is a clear departure from this trend. Every effort was exhausted to maximize the things you want to see, and to get rid of the things you don't. The smooth glass pebbles add a modern touch to this sleek hearth. And while the strong blaze of the hidden pan burner creates lively, colorful flames, the black porcelain reflective panels magnify them.

The Elegant Aura features a fully electronic ignition and control system with battery back-up for safe, reliable duty even in power outages. The system features a 50% Hi/Lo turn down control that can be operated from a wall switch or the convenient remote control included. The ceramic glass door provides maximum radiant heat.

The top, direct vent configuration of the Elegant Aura provides a wide variety of convenient venting options using our 5"/8" coaxial chimney system. The solid steel chassis face includes heavy, continuous nailing flanges and drywall stops around the face frame for solid installation, and includes a tough, textured powder coat finish.

Variable flame, low profile, hidden pan burner for amazing flame!

Concealed, electronic ignition and control system with mesh access panel, as well as, continuous nailing flanges and dry wall stops make the Elegant Aura not only simple to use but also to install.

Elegant Aura Direct Vent Fireplace
