

# PARIS LIGHTS

Vent-Free

The Luminary Series... where superior performance and unique versatility are showcased in an ultramodern design. A masterpiece on fire, but a presence that represents luxury with or without the flame.

## Sleek & Sophisticated

Introducing the Luminary Series Linear Vent-Free Fireplace System, Paris Lights. These dynamic new products are offered in an amazingly chic and polished style with adaptability and versatility you hadn't even thought of, yet.

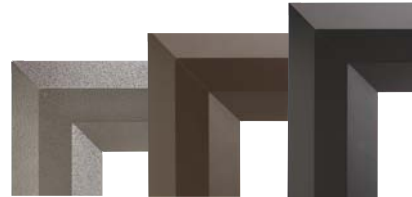

Paris Lights fireplaces span 43" across. Reflective black porcelain lined interior walls amplify the flame and boast the power of the fire. The lively blaze is highlighted by a glowing tray of embers and is innovatively accented with hallogen lighting. Crystal clear glass stones add sparkle to the dazzling yellow flames and are elegantly illuminated as the lights shine through from underneath. Create ambiance with the mood lighting whether the fire is burning or not.

The cutting edge linear design is far from traditional, yet all controls are concealed so the finished look remains clean and effortless. This standout series is beyond accommodating when it comes to application. Paris Lights Vent-Free fireplaces have the ability to transform to see-thru models with the LVSTI Vent-Free See-Thru Conversion Kit.

Finish your Luminary right up to the edge or opt for one of our Decorative Face Trims, available in three colors.

You can easily convert your Linear Fireplace to a See-Thru model and enjoy the flame from two rooms at once!

Be bold with one of our Decorative Face Trim Frames in aged silver, aged copper or black.

Glass Pebbles available in Amber, Speckled Orange, Green and Blue.
