Classic Beauty, Ultimate Flexibility

America is moving outdoors. And Fmi's Alpine outdoor vent-free gas fireplace systems transform just about any backyard into a private year 'round oasis. The Alpine can be installed virtually anywhere, and come in one beautiful and complete package with all the conveniences and new features homeowners will love!

The Alpine features clean, brushed stainless steel faces and stainless mesh spark screens. The screens tuck out of sight behind hidden side pockets to maximize the beauty of the fireplace. They also include the industry's finest colored and textured refractory brick liner for a true masonry look. Integrated gas log sets feature intricately detailed bark, split wood and charred textures. Random dancing yellow flames with a deep glowing ember bed complete the full and realistic flame picture.

Available in 36" and 42" sizes with either natural white or warm red brick, there's a perfect Alpine for any outdoor room. All controls are hidden to eliminate hearth clutter and maximize the real woodburning feel. All models feature glowing ember bed burner with remote ready control and push button ignition.

Alpine is an extremely economical installation since it requires no venting or chimney construction whatsoever. Not only does that reduce costs, but may also be allowed where restrictions prohibit typical vented outdoor fireplaces.

Alpine models feature random natural flame patterns.

36" Fireplace with Natural White Herringbone Brick Refractory.

36" Fireplace with Warm Red Stacked Brick Refractory.
