Heat Output:	100,000 BTUs/hour (based on a 30 lbs load)
Size of Firebox:	3.1 cubic feet (EPA)
Glass Viewing Area:	332 square inches per door
Chimney:	6 inch (please refer to the owner's manual for a complete list)
Tested & Approved:	EPA 28 & 5G option 3, CSA B-415.1.10, UL 127-2011 and ULC S610-M87
Emissions:	3.6 g/hour with EPA method 28 & 5G 2.2 g/hour with CSA method B-415.1.10

SUPREME FEATURES

EPA SEE-THROUGH FIREPLACE

The Duet is the industry's most efficient and cleanest burning see-through fireplace. It is EPA tested and approved with very low emissions. This product also has the unique application of being installed with one side of the fireplace indoors and the other side outdoors.

STAINLESS STEEL FIREBOX

The firebox is constructed of high grade stainless steel which allows a quicker heat transfer, more durability and less maintenance.

PATENTED AUTOMATIC AIR CONTROL

This innovative mechanism provides automatic means to gradually reduce the combustion air to the user's preset setting. Patent No: US 7,325,541 B2

CHIMNEY SWEEPING CAP

This unique feature allows for easy access when cleaning the chimney without having to remove any components of the fireplace.

BLOWERS (125 CFM EACH)

The Duet comes equipped with two heat-activated blowers and a variable speed control that promotes the distribution of warm air into the room.

UNIQUE DOOR OPERATION

Both doors are functional therefore the user can conveniently load his fireplace on either side. The handles have an ergonomic design that allows the doors to remain hermetically shut by means of a latch for a secure operation.

SEALED ASH PAN

The bottom of the firebox is perforated so the ashes fall directly inside a sealed ash pan. This feature provides an easy and clean way to dispose of the ashes.

REMOVABLE ASH LIP

Clean and convenient – this removable accessory prevents the ashes from falling on the hearth.

EASY-LIGHT

(PATENT PENDING #GB1305646.0)

This mechanism is linked to the automatic air control to provide a controlled amount of additional primary air inside the fireplace through the grate of the ashtray to help start a fire quickly and without intervention.

VARIABLE SECONDARY AIR CONTROL (PATENT PENDING # GB1307428.1)

This innovative mechanism automatically regulates the amount of secondary air with the temperatures of the fireplace. The secondary air enters the firebox through a perforated hollow baffle in a downward direction to mix with the rising gases of the wood to create a unique arrangement of natural and appealing flames that prolongs the combustion, increases the efficiency and reduces the emissions of the fireplace.

DIMENSIONS

Recessed Installation

The chase can be recessed to a maximum depth of 5 inches on each side.

The minimum dimensions of the recessed wall are 36" wide by 44" high measured from the base of the fireplace.

The recessed wall (36" x 44") must be built out of non-combustible materials.

OPTIONS

- Fireplace available in metallic black or charcoal
- Fresh air kit
- Can be installed with a stainless steel liner inside a masonry chimney
- Can accept up to two hot air ducts to send warm air as far as 30 feet away
- Block-Off Shield for Four Seasons Configuration (Indoor/Outdoor Installation)

BUILT-IN BBQ

A barbecue grill is stored inside the firebox to allow its users to cook their favorite meals when the wood is reduced to embers. This exclusive feature is accessible on either side of the fireplace.

A wood burning fireplace is the centre of your home; an open invitation to come and gather and an irresistible enticement to stay, a hub where dreams are fashioned, where relationships blossom, and where memories are forged. Your wood burning fireplace charms all your senses, offers calm and serenity as it shuts out the hustle and bustle of everyday life.

Supreme, your provider of warmth, elegance, and reliability for over 30 years, is a convivial family owned business dedicated to its environmental responsibility, its customers, and its full line of products.

Our commitment to the environment is broad and all inclusive. It begins in our plant where, in accordance with our environmental policies and whenever it is possible, we choose materials and practices which are not harmful to the environment, and produce the highest quality EPA approved fireplaces and inserts, burning cleaner and producing far fewer emissions than ever before.

We are also dedicated to offering our customers a wonderful and seamless experience. We sell warmth, comfort and peace of mind, and fully propose the same kind of customer support through uncompromising quality, warm sophistication, and lifetime dependability. With this combined level of individual consideration and commitment we can guarantee that you will be and remain completely satisfied.

Our award winning products are of the highest quality, incorporate the most innovative designs and technologies, are guaranteed to be extremely user friendly and are backed by one of the best warranties in the business. Their sophisticated timeless beauty will delight you for years to come.

Join us, escape to your home, pause quietly by your hearth,
*"Dreaming the dreams of the most fortunate,
Warm and toasty....."* (Frances W Carlin, 2009)©
