

# SmarterMeasure™

## Learning Readiness Indicator

SmarterMeasure is a web-based assessment that measures non-cognitive attributes, technical skills, and readiness for online/self-regulated learning. It can be given to students in the admissions process or as part of an FYE/Orientation course.

It is a vital component in proactive assistance and improving retention. Students receive a detailed report of their results with positive reinforcement & helpful resources. Advisors can view the student reports to make advising much more personal & efficient. Faculty are able to more quickly identify at-risk students. Institutions can use the data in aggregate to identify gaps in resources, trends among students, & predictive correlations to student success factors.

**11%** In failure rates in

## What Students Have to Say About SmarterMeasure

“My reading rate & recall score wasn’t too good, so I implemented some new habits which *helped me improve my test scores* over the past few weeks.”

“SmarterMeasure indicated that I may struggle with procrastination and time management. So over the course of this term I used one of the suggestions for improvement and started using the calendar on my phone as a way to keep track of assignment due dates. I have even turned in a few assignments early. These changes have been tough, *but I am seeing the benefits of these strategies.*”
