HONDA ST 1300 SARGENT WORLD SPORT PERFORMANCE SEAT INSTALLATION GUIDE

Remove stock seats as per the ST1300 owners manual.

Make sure that the front seat height adjustment bar on the motorcycle is in the preferred location.

Install the front World Sport Seat, being careful to hook the front receivers "B" onto the tabs under the left and right sides of the tank. Also, be sure that the height adjustment bar slides **into** location "A" **ON TOP OF** the tongue.

Next, be sure that the wire locators go into the correct receivers 1,2,or 3 and correspond to the desired seat height. **NOTE:** For the low position, this may require some extra forward pressure.

Slide the rear seat in place, making sure that the tongue "D" goes **ON TOP OF** the front seat connecting bracket bar "C".

Next, to latch, apply firm pressure to the back of the rear seat.
